

Emergency response

One, divulges emergency processes

The rapid evacuation divulges the pollution area personnel to the safe area, strictly limits the difference, fire hazard. Emergency processes the personnel wears is self-sufficient the type respirator, puts on the general protection clothing. In guarantees under the security situation stops up leaks. With the sandy soil or other mix absorptions, then the collection transports to the waste treatment place. Massively divulges: Constructs accepts, after then the collection, the shift, the recycling or harmless processing waste abandons.

Two, protective measure

Respiratory system protection: When possible to contact its vapor, should wear the gas mask. When urgent situation evacuation, suggests wears is self-sufficient type respirator.

Eye protection: Wears chemistry safely protects the eyeglasses.

Bodily protection: Puts on the anticorrosion work clothes.

Hand protection: Wears guards against the chemical glove.

Other: The work scene prohibition attracts the smoke, eats food with the potable water. After work, thorough clothes do not have to bring to non-work place, alone deposits the contaminated pollution the clothes, afterwards again.

Three, first aid measure

Skin contact: Takes off the clothes which pollutes, with mobile clear water flushing skin.

Eye contact: Speaking of the eyelid, flushes 15 minutes with the mobile clear water. Goes see a doctor.

Inspiration: Rapidly is separated from the scene is fresh to the air place. Has difficulty in breathing when therapy. When the breath stops, immediately carries on the artificial respiration.

The food enters: By mistake take rinses mouth, for drinks the milk or the egg white, goes see a doctor.

Fire fighting method: Sandy soil, dry powder, froth, carbon dioxide. The prohibition use acid and alkali fire medicinal preparation.
